JK Construction

Health and Safety Policy Statement

JKay Construction is committed to operating in a manner that minimises risk to all employees and prevents injury to all involved in our business operations through the application of best Health and Safety practice.

JKay Construction will:

- Comply with all relevant laws, regulations and codes of practice which apply to our operations.
- Conduct Health and Safety risk assessments prior to commencing every project
- Establish systems for reporting and recording processes which will be used to proactively reduced risk and improve Health and Safety.
- Ensure all employees receive appropriate Health and Safety communication and training prior to commencing operations.

All individuals employed by JKay Construction will:

- Report any actual or potential safety related issues
- Comply with all JKay Construction policies and procedures
- Take responsibility for their health and safety and that of others affected by their activities
- Actively participate in JKay Constructions H&S systems and processes to reduce risk and improve health and safety at work
